

Are you achieving optimum productivity? JM Equipment can help!

New Equipment

- sheeters (Goodstrong)
- guillotine cutters (Datien)
- dimension gauges (Quick Skan)
- decurlers
- core splitters
- offset pivot guides
- tension control systems
- linear dancer systems
- slitter stations
- web cleaners

Upgrades & Retrofits

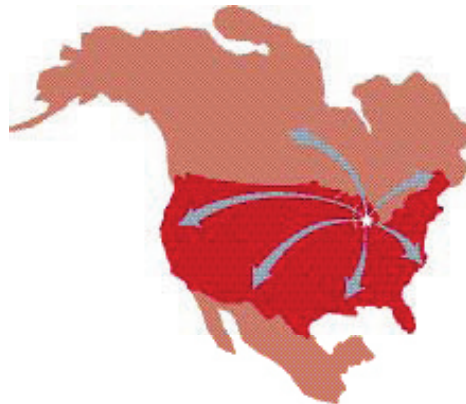

- roll stands
- edge guides
- tension control systems
- decurler systems
- web guides
- slitters
- dual rotary knives
- pilers/stackers
- pneumatic vibration jiggers

Refurbishing & Reconditioning

- Roll stands (Martin and others)
- Sheeters (Maxson, Moore & White, Clark-Aiken, Southworth, SHM)
- Guillotines
- Splicers
- Stackers

Support Services

- consulting — paper converting
- equipment troubleshooting
- equipment removal and installation
- equipment maintenance
- dual rotary knife maintenance and tuning

***Over 20 years of sales and service support to
the converting industry ...
with a centralized location to better serve
customers throughout North America.***

***JM Equipment currently sells products for the following
manufacturers in North America.***

- BloApco
- Datien
- Farin
- Fuma
- Fife
- CG Machinery
- Goodstrong
- Mag Power
- Powerhandling
- Quick Skan
- Tidland

Roll-Rite™ Rollstands

“The right rollstand at the right price”

A low-profile, heavy-duty rollstand with the industry's best features ... and the industry's best price tag.

JM EQUIPMENT INC.
Converting Machinery Solutions

Worldwide Solutions for Converters Throughout North America

The Roll-Rite™ Rollstand keeps productivity on a roll

Twenty years ago, JM Equipment started in business refurbishing used converting machinery. We quickly built a loyal customer base throughout North America with our rebuilt Martin roll stands.

Along the way, we discovered a tremendous need for an affordable, yet reliable, rollstand. So we put our years of experience to the task and designed a rollstand with the most important productivity features and the quality converters need. Then we kept our margins low so every company could afford to buy one.

The result is the Roll-Rite Rollstand. We think it's a great value – and so do our customers.

Do you need an exceptional value in a rollstand? The right solution has just become available.

Call JM Equipment to explore all your converting equipment needs, We offer new equipment from an international base of quality OEMs and we're still an excellent source for used and refurbished equipment. Plus, we provide a wealth of key services, including machine maintenance and repair, inspection, installation and more.

You asked for a better rollstand at an affordable price ...

... we achieved both objectives with the new Roll-Rite™ Rollstand!

The Roll-Rite Rollstand is designed for production-driven, safety-minded companies that don't have unlimited budgets for new equipment. Now you can load big rolls faster and position them perfectly without workers risking injury from trying to man-handle full-size rolls.

Finally, a full-feature rollstand that won't break the bank:

- shaftless dual or single position
- single hydraulic for arms to lift rolls from the floor
- shaftless dual chucking
- maximum Roll Weight 7,000 lb
- maximum Roll Width: 65"
- split roll capability
- no manual skew
- manual lateral adjustment
- E-Z Load side-shifting trolley standard
- two 12 ft section of track and trolley, one per roll position with lateral side shift capabilities - standard

JM Equipment brings a world of converting solutions to your door.

The Roll-Rite system comes complete with side-shifting track and trolley, powerful self-loading arms, and an impressive list of operating features that will cut roll handling time while boosting your bottom line.

Best of all, the Roll-Rite Rollstand system has a base price of \$49,000. That's thousands less than competitive models touting fewer features. That's why customers have dubbed the Roll-Rite "the right rollstand at the right price."

Specifications:

- speed: 1600+ ft/min
- roll diameter: 12" min, 83" max
- roll width: 63" max width
- core size: 4", 3-6", 10-12" (custom sizes available)
- roll weight: 7,000 lb/reel
- choice of 4 brake types
- one full year factory warranty

Productivity Options:

- aisle loading (for multiple stands)
- choice of edge guiding systems
- exit idler rolls
- 12" to 16" chucks available
- choice of air-cooled disc brakes
- tandem web operation
- tension control (open or closed loop)

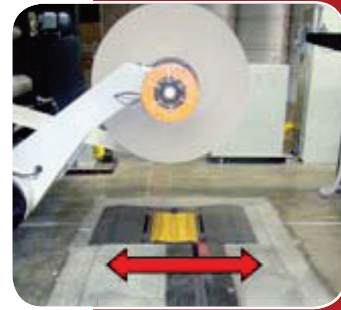

Shown here is a Roll-Rite Rollstand positioned under a boxboard converting line. Far right photo shows Roll-Rite Rollstand under a FUMA automated splicer.

Don't risk personal injury pushing rolls by hand!

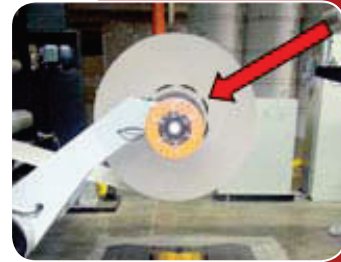

The E-Z Load Track and Trolley systems with lateral side-shifting are standard with every Roll-Rite™ Rollstand.

- Side-shifting trolley – positions all rolls in perfect rollstand alignment
- Eliminates need for workers to push large rolls into position
- Easy loading. Easy positioning. Safe and productive.
- Low-profile – won't interfere with forklifts and shop carts

E-Z load trolley with side shifting is standard

Optional stop on preset roll diameter

Push button controls each arm

Allen-Bradley PLC controller

Pneumatic air-cooled disc brakes on each arm

Cost-effective converting machinery solutions you can count on.
